

# Guadalupe River Basin Clean Rivers Program

2008

Steering  
Committee Meeting

# Guadalupe River Basin Clean Rivers Program

## **2008 Activities and Deliverables**

### Project Administration:

Progress Reports and Invoicing

Management of Sub-Agreement with

UGRA

Attendance on CRP meetings

# Guadalupe River Basin Clean Rivers Program

## **2008 Activities and Deliverables**

### Quality Assurance:

Develop and maintain Quality Assurance Project  
Plan

Coordinated Monitoring Meetings

# Guadalupe River Basin Clean Rivers Program

## 2008 Activities and Deliverables

### Water Quality Monitoring:

- 19 Monitoring Sites – Monthly (GBRA)
- 6 Monitoring Sites – Quarterly (GBRA)
- 1 Special monitoring – Bimonthly (GBRA)
- 10 Monitoring Sites – Quarterly (UGRA)
- 7 Sites Biological/Habitat Assessments—Annual (GBRA and UGRA)
- 2 Sites Metals – Annually (GBRA)
- 1 Site Radiological – Quarterly (GBRA)
- 2 Sites Metals in Sediment – Annually (GBRA)
- 3 Site Organics in Sediment – Annually (GBRA)
- 2 Diurnal sites – GBRA and Wimberley Valley
- 7 Monitoring sites – Monthly, March thru Oct (WVWA)

# Guadalupe River Basin Clean Rivers Program

## 2008 Activities and Deliverables

### Water Quality Monitoring (cont.):

Bimonthly monitoring on Peach Creek at FM 397,  
in support of TMDL project

Quarterly monitoring at Coletto Creek at Arnold Rd.  
- Radiologicals

# Guadalupe River Basin Clean Rivers Program

## **2008 Activities and Deliverables**

### Data Management and Watershed Inventories:

Submit data files to TCEQ monthly

Data available on website in Excel or PDF

Events Inventory

## Landowner educational brochure

### **Watershed Awareness:** *Just the Facts!*

Exercise your rights and your responsibility to be *"In the Know"* about watersheds.

**First of all, what is a "Watershed"?**

A watershed is the area of land that drains into a specific water body. You live in one of the many mini-watersheds that make up the Guadalupe River Basin – one of the most beautiful in the state of Texas.

**What do you REALLY need to know about watersheds?**

You need to know that your actions can have an impact on the water quality (how clean the water is) in your watershed. Whether you know it or not, you can leave 'footprints' that can have a detrimental effect on how clean the water in the river is.... And this is water that is used by thousands of folks for drinking water. It is also used for agriculture, industry and recreation.

# Highlights of 2007-08 Work Plan

## Coordinate with other monitoring projects

- TSSWCB Plum Creek Watershed Protection Plan
- Basin Summary Report
