**FOR IMMEDIATE RELEASE**

May 26, 2005

SEGUIN---- Guadalupe-Blanco River Authority (GBRA) hydroelectric crews continue routine maintenance to the Meadow Lake (Nolte Dam) spill gates through Friday, May 27 when lake levels will then be returned to normal levels for the Memorial Day Weekend.

Beginning Monday evening, May 30 and throughout the following week, the level of Meadow Lake will continue to be approximately 20-24 inches below normal so GBRA crews can continue this project.

GBRA advises anyone using Meadow Lake for recreation purposes during this time to exercise caution, since lower lake levels may expose debris and other potential hazards that are normally underwater.

The public is advised that scheduled operations may be canceled or adjusted in the event of adverse weather conditions.
