**FOR IMMEDIATE RELEASE**

July 6, 2006

Seguin-The Guadalupe-Blanco River Authority will perform routine maintenance on Lake Placid (TP-4) Thursday, July 6. The Lake will be approximately 12 inches below normal during this time.

This routine maintenance is expected to be completed by the end of the day on July 6, however scheduled operations may need to be extended for an additional period of time. When the work is completed, the lake will return to normal level.

Operations may also be adjusted or canceled in the event of adverse weather conditions.

GBRA advises anyone using Lake Placid for recreation purposes during this time to exercise caution, since lower lake levels may expose debris and other potential hazards that are normally underwater.
