Lake Placid (TP-4) to be lowered November 12-17 for routine dam maintenance

For more information: Tammy Beutnagel, [830] 379-5822, email tbeutnagel@gbra.org

FOR IMMEDIATE RELEASE

November 12, 2007

SEGUIN---- Beginning the evening of Monday, November 12, 2007 Lake Placid (TP-4) will be lowered approximately 12 to 15 inches below normal so that Guadalupe-Blanco River Authority (GBRA) hydroelectric crews can perform routine maintenance to the dam.

The public is advised that these scheduled operations may be completed before November 17, 2007, or may need to be extended for an additional period of time. Operations also may be adjusted or canceled in the event of adverse weather conditions.

GBRA advises anyone using Lake Placid (TP-4) for recreation purposes during this time to exercise caution. Lower lake levels may expose debris and other potential hazards that are normally underwater.

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
