Lake Placid (TP-4) Lowering Extended thru Oct. 4 to Continue Routine Dam Maintenance

For More Information

SEPTEMBER 30, 2008

Tammy Beutnagel, GUADALUPE-BLANCO RIVER AUTHORITY, [830] 379-5822 or email tbeutnagel@gbra.org

SEGUIN---- The level of Lake Placid (TP-4) will continue to be approximately 12 to 18 inches below normal so that Guadalupe-Blanco River Authority (GBRA) hydroelectric crews can continue routine maintenance to the dam.

The public is advised that these scheduled operations may be completed before October 4 or may need to be extended for an additional period of time. Operations may also be adjusted or canceled in the event of adverse weather conditions.

GBRA officials advise anyone using Lake Placid (TP-4) for recreation purposes during this time to exercise caution. Lower lake levels may expose debris and other potential hazards that are normally underwater.

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
