## **Meadow Lake (Nolte) Lowering Extended**

### **GBRA Advises Work May Be Completed On or Before Target Date**

**For More Information**

OCTOBER 30, 2008

Tammy Beutnagel, GUADALUPE-BLANCO RIVER AUTHORITY, [830] 379-5822 or email tbeutnagel@gbra.org

SEGUIN---- The level of Meadow Lake (Nolte) will continue to be approximately 18 to 24 inches below normal so that Guadalupe-Blanco River Authority (GBRA) hydroelectric crews can perform routine maintenance to the dam.

The work is expected to be completed by Nov. 21 and the lake level will return to its normal level by Saturday morning Nov. 22.

GBRA officials are advising that these scheduled operations may be completed before Nov. 21, or may need to be extended for an additional period of time. Operations may also be adjusted or canceled in the event of adverse weather conditions.

GBRA officials advise anyone using Meadow Lake for recreation purposes during this time to exercise caution because lower lake levels may expose debris and other potential hazards that are normally underwater.

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
