## Lake McQueeney to be Lowered April 19 thru May 22 For Routine Dam Maintenance

### For More Information

APRIL 06, 2009

Tammy Beutnagel, Guadalupe-Blanco River Authority, [830] 379-5822 or email [tbeutnagel@gbra.org](mailto:tbeutnagel@gbra.org)

SEGUIN----Beginning Sunday, April 19 Lake McQueeney level will be lowered approximately 12 to 18 inches below normal so that Guadalupe-Blanco River Authority (GBRA) hydroelectric crews can perform routine maintenance to the dam.

GBRA officials are targeting a completion date on or before May 22 for scheduled maintenance. Operations also may be adjusted or canceled in the event of adverse weather conditions.

GBRA officials advise anyone using Lake McQueeney for recreational purposes during this time to exercise caution. Lower lake levels may expose debris and other potential hazards that are normally underwater. For questions about Lake McQueeney levels during maintenance, please call GBRA(830) 379-5822.

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
