Lake Placid (TP-4) to be Lowered August 3-6 for Routine Dam Maintenance

For More Information

JULY 28, 2010

Tammy Beutnagel, Guadalupe-Blanco River Authority, [830] 379-5822 or email tbeutnagel@gbra.org

SEGUIN---- Beginning the evening of Tuesday, August 3, 2010 Lake Placid (TP-4) will be lowered approximately 48 inches below normal so that contractors can perform work.

The public is advised that these scheduled operations may be completed before August 6, 2010 or may need to be extended for an additional period of time. Operations may also be adjusted or canceled in the event of adverse weather conditions.

The Guadalupe-Blanco River Authority (GBRA) advises anyone using Lake Placid (TP-4) for recreation purposes during this time to exercise caution. Lower lake levels may expose debris and other potential hazards that are normally underwater.

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
