## GBRA Reinstates Stage III Drought Measures after Rescinding Stage IV

### For more information

LaMarriol Smith, GBRA, (830) 379-5822, lsmith@gbra.org

SEGUIN, TX — Guadalupe-Blanco River Authority (GBRA) officials on Friday rescinded Stage IV drought restrictions for diversions and use of water from the hydroelectric lakes in Comal, Guadalupe and Gonzales counties, effectively **reinstating Stage III** restrictions until further notice. Stage III drought restrictions will affect lawn watering, outdoor fountain use, vehicle washing and other areas.

Critical period stages apply to any diverter of water other than contracted stored water that diverts and uses water from any of the GBRA Hydroelectric Lakes ? **Lake Dunlap** (Comal and Guadalupe counties, **Lake McQueeney** (Guadalupe County), **Lake Placid** (Guadalupe County), **Lake Nolte** (Guadalupe County), H4 or **Lake Gonzales** and H5 or **Lake Wood** (both in Gonzales County).

With Stage III in effect, the following restrictions on the Hydro Lakes will apply:

- 1.) All of the prohibitions applicable in stages I and II apply in Stage III, except to the extent replaced by more restrictive conditions imposed by this stage.
- 2.) Landscape watering is prohibited between 9 a.m. and 7 p.m., and is further restricted such that properties with an odd-numbered address may landscape water only on Mondays and Fridays, and properties with an even-numbered address may landscape water only on Tuesdays and Saturdays. However, landscape watering by means of a bucket or hand-held or soaker hose, or a properly installed drip irrigation system is permitted at any time. This subsection does not apply to reclaimed, recycled or reuse water.
- 3.) No person may use water for an ornamental outdoor fountain or similar feature.
- 4.) No person may wash a vehicle at other than a commercial vehicle wash facility except over a pervious surface area, during the above designated watering days and times with a hand-held hose with automatic shut-off nozzle or using a bucket.

The penalty for wasting water or any violation of Stage III restrictions as determined by the GBRA general manager, or his designee, is \$100-\$200 per day per violation.

Restrictions from stages I and II already prohibited wasting water from irrigation or vehicle washing, and required the use of covers for swimming pools to prevent evaporation when not in use.

Restrictions of a drought contingency stage may be terminated when the condition listed as the triggering event for such stage has ceased to exist. Upon termination of the restrictions of the applicable stage, the restrictions of the prior stage become operative.

GBRA's Drought Contingency Plan is available to read online at the following link :

<http://www.gbra.org/documents/conservation/GBRADroughtContingencyPlan.pdf>

Other drought details and information may be found on GBRA's website at: <http://www.gbra.org/drought/default.aspx>

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria,
