## **Spill Gate Work by GBRA to Require Temporary Lowering of Lake Gonzales (H-4)**

### **For more information**

LaMarriol Smith, (830) 379-5822, [lsmith@gbra.org](mailto:lsmith@gbra.org)

GONZALES, TX —Guadalupe-Blanco River Authority hydroelectric crews will begin maintenance work on the spill gate at Lake Gonzales (H-4) early Monday, Sept. 28, 2015.

The maintenance work will require work crews to lower the level of Lake Gonzales approximately 1½-feet to 2-feet for four to six weeks depending on weather conditions and/or other factors. Lowering of the lake will begin on Sunday morning Sept. 27, 2015.

GBRA advises anyone using the lake for recreational purposes during this time to exercise caution because lower lake levels may expose debris and other potential hazards that otherwise are normally under water.

The work is considered routine maintenance. Should the work schedule require any significant adjustments, GBRA will disseminate notices via press releases to local media and lake associations and post accordingly on the press release and lake management pages of GBRA's website: [www.gbra.org](http://www.gbra.org). Information also may be posted on Twitter with “@GBRATX” and Facebook on the page “GBRA of Texas.”

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
