Canyon Release to be Reduced

For more information

LaMarriol Smith, 830-379-5822, lsmith@gbra.org

SEGUIN - The flow releases from Canyon Reservoir will be decreased from current levels of about 270 cubic feet per second (cfs) to about 200 cfs at 9 p.m. this evening (Friday, Sept. 16, 2016). This flow reduction will remain in effect until further notice. As always, flow releases may change in response to rainfall or other factors.

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
