Notice Regarding Canyon Flows

For more information

LaMarriol Smith, 830-379-5822, lsmith@gbra.org

The flow releases from Canyon Reservoir will be decreased from current levels of about 1,100 cubic feet per second (cfs) to about 400 cfs at 10 a.m. Thursday, Mar. 9, 2017 as flood water stored in Canyon from recent rains has now been safely passed downstream. The flows will continue at this level until at least Monday, March 13, 2017. At that time, the flows will be reevaluated and an update will be provided. As always, flow releases may change in response to rainfall or other factors
