

Canyon Lake Release Advisory  
December 17, 2018

The water level in Canyon Reservoir has decreased to near conservation pool level and is currently at 909.32 ft. mean sea level (msl). GBRA will lower the release rate to 380 cubic feet per second (cfs).

Property owners, recreationalists and other stakeholders should take notice of the changing river flows. Additional information about Canyon releases and other stream flow data may be found at <https://bit.ly/2NI2HTz>.
