Canyon Flows to be Reduced

For more information

LaMarriol Smith, 830-379-5822, lsmith@gbra.org

The flow releases from Canyon Reservoir will be decreased from current levels of about 300 cubic feet per second (cfs) to about 260 cfs at 2 p.m. today (Thursday, Jan. 12, 2017). As always, flow releases may change in response to rainfall or other factors.

The GBRA was established by the Texas Legislature in 1933 as a water conservation and reclamation district. GBRA provides stewardship for the water resources in its 10-county statutory district, which begins near the headwaters of the Guadalupe and Blanco rivers, ends at San Antonio Bay, and includes Kendall, Comal, Hays, Caldwell, Guadalupe, Gonzales, DeWitt, Victoria, Calhoun, and Refugio counties.
